Pools: All pool permit applications must have the Wiring Permit # noted on them before they can be approved for issue.

Inground: Needs site plan noting distance from lot lines, septic system, and any wetlands on or near property. Pool must be at least 20 feet from side line, 30 feet from rear line, and 35 or 40 feet from front lot line depending on Zoning District. Pool must be at least 10 feet from septic tank and 20 feet from leaching field. All inground pools must be at least 100 feet from any wetlands. (This 100-foot distance is called the “buffer zone”). The Conservation Commission must sign off on the building permit application. If not 100 feet away, an Order of Conditions from the Conservation Commission must be recorded at the Registry of Deeds before a building permit can be issued. If not at least 50 feet away, a setback variance is also required from the Zoning Appeals Board and must be recorded at the Registry before the building permit can be issued. Home improvement registration is required for inground pool contractor. Construction supervisor license is not required. Workmen’s Comp. Insurance Form is required.

Above-ground: **A site plan indicating the approximate pool location should be submitted with the application.** Pool must be at least 10 feet from side and rear lot lines and 35 or 40 feet from front line depending on Zoning District. Pool should not be placed in an easement or on top of septic system. Construction supervisor license and home improvement registration are not required for above-ground pool contractor. Workmen’s Comp. Insurance Form is required.

*All access to inground and above-ground pools must be controlled by a **4-foot high** non-climbable barrier as prescribed in Sixth Edition of Massachusetts State Building Code 780 CMR Section 421.*

Permit Fees:

(Two separate checks required - Each payable to “Town of Bridgewater”)

Pool Type	Building Fee	Wiring Fee
Inground Pool	\$40.00	\$60.00
Above-ground Pool	\$30.00	\$40.00

AFFIDAVIT

I understand that it is my responsibility to file with the Bridgewater Conservation Commission if designated work is within the 50-100 foot buffer zone from a delineated wetland. The granting of a building permit does not indicate compliance with the Wetlands Protection Act.

I certify that no work will be done within 100 feet of a bordering vegetated wetland. Subsequently, if work is found to be within a wetland area, a Cease & Desist will be issued by the Bridgewater Conservation Commission resulting in a mandatory filing with the Bridgewater Conservation Commission.
