

New Meters to Be Installed

Mass Installation, Inc., contractor for the Town of Bridgewater Water Department will be performing water meter installation services at the residential and commercial properties throughout the Town of Bridgewater during the next few months.

Residents will receive a mailing from Mass Installation explaining the installation process and requesting them to call Mass Installation, Inc. to schedule an installation appointment. **Please do not call Mass Installation, Inc. until you receive your notice.** The installation of your meter will take less than forty-five minutes.

With these meters, customers will have the ability to go on-line to check water consumption at any time once they sign up for the Waterscope program. This program also alerts customers to possible leaks that can sometimes go unnoticed for long periods of time. Participation in the Waterscope program is not mandatory but is recommended.

There will be no cost for the new meter. The meter and installation fees will be paid by the Town of Bridgewater.

Meter installers will have picture identification, badges and will be driving clearly marked vehicles. Residents are advised to allow entry only to those installers displaying proper identification. Please contact the Water Department at 508-697-0910 with any questions you may have.

PARTICIPATION IN THIS METERING PROGRAM IS MANDATORY, FAILURE TO COMPLY WILL BE SUBJECT TO WATER SHUT OFF
